Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In the new claims 18-20, recitation regarding the parasitic inductance/capacitance is not supported in the specification as well as the recitation for the cross-coupling between first and second circuits being fixed....

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2817

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1,2,4, and 5,12, 13, 16,and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Liu(US 6,188,292, of record).

The reference by Liu discloses a quadrature coupled oscillator, (see figures 2 and 3) comprising first(202,210) module and second(204,212) comprising cross coupled multivibrators(202,204). Note mutual inductive (LC)resonant circuits(L1,2, L3,4, and the active circuit capacitance);the inductive loading in each oscillator allow for the coupling due to the close proximity of the inductive elements. Inherently, the oscillators and transconductance stages(210,212) allow for the phase shifting of the current supplied by the respective stages(210,212)note the sign(m,-m) of the coupling module(indicating a complementary phase)(see cols 3-col.5), and form part of the VCCS for each oscillator along with input terminal 350. The VCCS allowing for frequency control. The resonant circuits will pass max current at the resonant peak frequency and thus have a low impedance.

Response to Arguments

3. Applicant's arguments filed 07-03-03 have been fully considered but they are not persuasive. The examiner has considered applicant' s remarks about the previous action and is submitting a response that maintains the

Allowable Subject Matter

4. Claims 3, and 6-11, 14, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
